

# Policy of JSC «AVTOVAZ»

## IN THE FIELD OF ENVIRONMENTAL MANAGEMENT

**The management of PJSC «AVTOVAZ» officially announced a Policy in the field of environmental management to demonstrate the obligations on the maintenance and the improvement of the effectiveness of environmental activities during vehicles, spare parts and components design, purchasing, production and delivery.**

JSC «AVTOVAZ», being the largest automaker in Russia, manufacturing products under LADA brand and under the brand of strategic partner Renault-Nissan-Mitsubishi Alliance, assumes the obligations to:

- prevent pollution of the environment, applying the modern methods of product development and technologies, using domestic and international advanced experience, ensuring the stability of production processes;
- comply with effective legislative, normative and other requirements of the Russian Federation adopted in JSC «AVTOVAZ» and applicable to the environmental aspects of its activities;
- protect the environment by progressively mitigating the adverse effects of JSC AVTOVAZ ecological aspects of activity;
- rationally use natural, energy, material resources and reduce their specific consumption per unit of output, improve energy efficiency of production processes;
- increase the level of environmental competence and awareness among staff;
- ensure employees' engagement in environmental risk management activities, achievement of environmental goals and indicators, and improvement of the effectiveness of the environmental management system;
- strive for the prevention of abnormal, emergency situations and minimize their possible consequences for the environment, acting based on the principle: it is easier to prevent pollution than to eliminate its consequences;
- inform contractors about environmental requirements adopted in JSC AVTOVAZ;
- timely notify customers about the use in-vehicle materials that comply with the international environmental standards.

The management of JSC AVTOVAZ assumes responsibility for ensuring the continuous improvement of environmental activities in accordance with the requirements of the international standard ISO 14001 and for increasing the effectiveness of JSC AVTOVAZ environmental management system in the interests of the current and future generations.

**President**
